

Profile

Backend-focused Data Science student with experience in enterprise IT architecture support, web crawling, research computing, and data-intensive software systems. Strong interests include backend engineering, RAG/analytics pipelines, and practical machine learning.

Education

- 2023–09/2026 **Bachelor of Data Science**, *Katholische Universität Eichstätt-Ingolstadt*, Ingolstadt
2019–2023 **IT Specialist**, *Mikołaj Kopernik Telecommunications Technical School*, Poznań

Experience

- 03/2026–Present **Working Student – IT Architecture Support**, SIEMENS, Germany
- Maintained solution architecture overviews and documentation in a large-scale enterprise IT environment.
 - Analyzed IT landscapes and business processes, prepared decision-support reports/presentations, and researched cloud and architecture trends.
- 01/2026–Present **Student Assistant**, KATHOLISCHE UNIVERSITÄT EICHSTÄTT-INGOLSTADT, Germany
- **AI chatbot crawler**: Built the Python crawler/data pipeline behind KU's student-facing RAG chatbot, replacing a failing off-the-shelf scraper by crawling German and English ku.de content into AnythingLLM-ready JSONL with sitemap discovery, main-content extraction, SQLite crawl state, incremental re-crawls, and QA reports.
 - **Student research assistant**: Supported the Geography research group with HPC and research workflows on the FAU cluster (Linux/SLURM), including access setup, data transfer, execution support, and troubleshooting.
 - **Documentation**: Wrote user-facing guidance for SSH access, remote execution, and cluster usage for non-technical researchers.
 - **Conference website**: Developed and helped host and maintain the SampTA conference website, supporting updates and ongoing web operations.
- 08/2025–10/2025 **Data Science Intern**, KIMBALL ELECTRONICS, Poland
- Supported IT operations and contributed to database development through SQL optimization, triggers, and stored procedures.
 - Analyzed scrap/repair, forecasting, and packaging datasets; built Repair vs. Scrap and TopLineForecast ML prototypes.
 - Designed a Repair vs. Scrap prediction app proof of concept, improved trigger/workflow reliability, and presented work in Agile teams using Azure DevOps/Git.

Skills

Programming	Python, TypeScript, SQL, JavaScript
Web	React, Next.js, Node.js, FastAPI, Flask, REST APIs
Data & ML	Pandas, NumPy, Scikit-learn, SciPy, Machine Learning, Model Evaluation, Matplotlib, Seaborn, Plotly
Pipelines	Web Scraping, RAG Data Pipelines, BeautifulSoup, lxml, Playwright, SQLite, pytest, CLI Tooling
Data & Tools	PostgreSQL, SQL Server, Redis, Docker, AWS, Azure DevOps, HPC (SLURM), PowerBI, ETL Pipelines, Data Warehousing
OS	Linux (Bash, SLES), macOS, Windows
Certification	SLE201 SUSE Linux Enterprise Server Administration (SUSE Academic Training Program, 09/2021)

Projects

PageRank-Based Analysis of Scientific Papers [Code]

- Built a scalable bibliometric PageRank framework for analyzing research influence across millions of papers.
- Developed a distributed Semantic Scholar crawler with PostgreSQL/Redis storage, fault-tolerant task handling, and monitoring.
- Engineered a custom HPC PageRank workflow with monitoring via FastAPI.

MSIT-Hotel-Booking [Live] [Code]

- Built a bilingual hotel booking platform with customer and admin flows for a bleisure-focused property concept.
- Implemented booking lifecycle, waitlist, stay-management, occupancy, and revenue dashboard flows.
- Used Next.js, React, TypeScript, Supabase, and PostgreSQL with row-level security.

Personal Portfolio Website [Live] [Code]

- Designed and built a responsive React/TypeScript/Vite portfolio for experience, projects, skills, and a downloadable CV.
- Structured reusable, content-driven components and sections for a polished developer-facing presentation.

KULTour [Code], Hackathon Winner (Best Open Source)

- Built a travel recommendation app in a 24h hackathon (Tourism Technology Festival, Salzburg).
- Implemented ML-based tourism personalization with an interactive map UI for route and point-of-interest exploration.

Activities & Involvement

Data Science Student Council

- Contribute to student representation and communication around program-related topics.
- Help organize student events and support council activities within the program.
